

CUSTOMIZATION

Does your system capture the data but won't allow you to access it in the way you need?

Would you like to automate the tedious, repetitive tasks that your practice encounters on a daily basis?

Do your applications stop just short of where you need them to go?

ITENTIVE CAN HELP.

- Our Information Solutions team develops innovative, intelligent and customizable solutions for all of your clinical, business and information needs — across the full life cycle of your business process — that cannot be directly satisfied through the standard NextGen® product suite.

Count on us to bring our 15+ years of NextGen customization, enhancement, interface and conversion expertise to your practice.
