

TECHNOLOGY

Your NextGen® Healthcare system is the heartbeat of your practice. But is it secure?

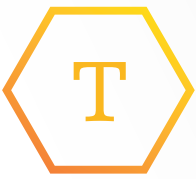

Can you rely on it to deliver the performance that you need, to keep up with patient volumes?

Most importantly, are you able to dedicate time to properly maintain it while running your practice successfully?

ITENTIVE CAN HELP.

- ◻ Itentive provides physician practices and other healthcare organizations with a true alternative to traditional in-house IT. Our managed IT and hosting services enable you to quickly deploy desktop and server applications without the associated cost and burden of owning, managing or supporting the applications, or the underlying technical infrastructure.

Count on us to help you maximize your return on investment, deliver the outcomes that you want and free you up to focus on more pressing business matters.
