

PRODUCTS

Do you find that everyday business tasks drain too much of your practice's resources?

Are you spending time on tasks that don't generate revenue?

Is your practice safeguarded if your network goes down?

Would you like to automate your NextGen® workflow processes?

ITENTIVE CAN HELP.

- Count on Itentive to deliver a range of industry-proven products that delivers valuable complementary features and functionality for the NextGen solution suite. Each of our products extends the reach of your NextGen® Practice Management and NextGen® Ambulatory EHR solutions to help you become more productive, profitable and secure.

Look to our products to help you improve patient care and workflow, create stronger relationships with care partners, boost operations and allocate time more efficiently.

PRODUCTS

◻ Itentive's automation and productivity tools include the following:

RefundManagerSM

RefundManager is a powerful value-add to NextGen Practice Management that streamlines and automates the most labor-intensive steps in the refund process to save your practice time and money.

- Quickly identify and research credit balances
- Substantially decrease check generation time
- Improve tracking and documentation of refunds
- Increase department productivity
- Decrease labor costs

ChartGuardSM

ChartGuard automatically creates customized, printable copies of your clinical charts for the next several days, along with a copy of your appointment book — and refreshes your archive every night.

- Your clinical charts and appointment book are always available — even when your system or network is down
- Eliminate investing in complex, redundant technologies that are expensive to acquire, set up or maintain
- Set and forget. ChartGuard protects your practice, night after night

NextGen APIs

Use our proven NextGen Application Programming Interfaces to integrate your applications seamlessly while enforcing NextGen application business and data compatibility rules.

- Demographics and Registration
- Appointment Search and Scheduling
- Encounter and Charts
- EHR Module and Template Data
